

Meet Tottori Resource Recycling to explore new water treatment solutions for public water treatment, aquaculture and industries - 25th to 27th November in Hanoi

Tottori Resource Recycling, Inc., a Japanese manufacturer of environmentally safe foamed glass, exhibits at #F109 in Vietwater 2015 in Hanoi, Vietnam from 25th to 27th November.

This is great opportunity for the professionals in **public water treatment facility, aquaculture and industries** to get to know (1) long-lasting microbial decomposition (bio-filtering), (2) adsorption of phosphate and (3) adsorption of fluorine.

Our long-lasting bio-filtering solution and adsorption of phosphate can contribute water quality improvement for aquaculture, sewage water treatment facility and rivers by decomposing organic matter and adsorb phosphate. Our fluorine adsorption solution provides no-sludge water treatment for industries.

Send us your meeting request to discover our water treatment solutions at our booth #F109 by sending e-mail to sato@t-rrl.jp with contact information and your domain of interest. Our stand is open from 9:00 to 17:30 on 25th and 26th, and from 9:00 to 16:00 on 27th November.
